Recommendation

The Organization, "Zir Chemed" was established with the scared aim of assisting childless couples not yet blessed with the fruit of the womb. Frequently these are compelled to go through difficult medical tests and procedures, some that conflict with Halacha , at great financial cost. The above organization aims to help them with professional counseling, practical directives and medical help, with tests and procedures conducted with honor and modesty while guided by Talmedie Chachamim with the best doctors in order to grant the finest medicine and care under rabbinic supervision.

I sanction May they go from strength to strength . Great is the mitzvah to lend support to the above organization and it's head Rav Nachum Tannenbaum Shlita, and it is a mitzvah to contribute to them generously and warmly, and from Hashem will be raised a blessing.

All these who assist and support them will merit plenty, blessing, learned children, long life, livelihood and sustenance bounty, contentment and honor "there will not be among you a barren man or woman" and "You will see your children's children" Amen vAmen.
